Pamela,

Thank you for your work on the MTIP! One item I did not see on the list however was consideration of regional ferry service on our area rivers. I think Portland is a perfect candidate for a modern, green mode of transportation that has the potential to not only curb congestion, but provide a fun and unique way to show off our city. Cities around the world, such as London, Amsterdam, New York and Seattle have mastered their navigable waterways. Whether it is for commuters, tourists, or 6th grade classes learning about Portland history and infrastructure, a regional ferry service should be included in transportation improvement discussion.

Have a great weekend!
