Representative Kokek,

I believe that the passenger ferry concept for the Portland area is both a fiscally prudent and visionary idea worth investment by the Capital Construction Sub-committee. The ferry has the potential to reduce traffic congestion, improve social equity (by knitting together both sides of the Willamette River), attract tourists, enhance appreciation for the care of the Willamette, and free up roadways for freight and other traffic. I urge you to include support for Portland-area passenger ferry service in your budgeting process.

Cordially,

Kevin Bross
Tigard, OR
