Susan Bladholm  
Friends of Frog Ferry  
Portland OR / Vancouver WA

Dear Susan,

Thank you for pioneering an environmentally friendly passenger ferry service for our community in Portland/Vancouver. As a Benefit Corporation for Good, we stand behind you on your mission to successfully implement an environmentally and economically equitable ferry service along the Columbia and Willamette River waterways.

In the wake of the COVID-19 pandemic, we've seen our community come together in a time of need. We need that same energy to solve Portland's traffic congestion with environmentally friendly solutions. Other West Coast cities such as San Francisco and Seattle utilize ferries, as they require less capital intensive and a more environmentally friendly service to our waterways and parks along our rivers.

We look forward to leveraging our waterways to benefit commuters and tourists and to provide an economically and environmentally friendly means of transportation. This initiative will bring much desired investments and revitalize our waterfront.

Pacific West Bank supports Friends of Frog Ferry's project.

Sincerely,

*Robert C. Harding*
